

2020 Interdisciplinary Contest in Modeling® Press Release—April 24, 2020

COMAP is pleased to announce the results of the 22nd annual Interdisciplinary Contest in Modeling (ICM). This year 7199 teams representing institutions from sixteen countries/regions participated in the contest. Eighteen teams were designated as OUTSTANDING representing the following schools:

Beijing Forestry University, China
Beijing Normal University, China
Brown University, RI, USA (Rachel Carson Award)
Capital University of Economics and Business, China
Dongbei University of Finance and Economics, China
Donghua University, China
Nanjing University of Posts & Telecommunications, China
New York University, NY, USA
Shanghai Jiao Tong University, China (INFORMS Award)
Shanghai University of Finance and Economics, China
South China University of Technology, China
University of Electronic Science and Technology of China, China
University of International Business and Economics, China
The College of William & Mary, VA, USA
(COMAP Scholarship Award & Leonhard Euler Award)
Xi'an Jiaotong University, China (3)
(INFORMS Award 2009139, COMAP Scholarship Award & Vilfredo Pareto Award 2013772)
Xidian University, China (INFORMS Award)

that limit the ability to reach this safe level and ways to more equitably distribute causes and effects. The F Problem asked students to create an international policy that would address the resettlement needs of environmentally displaced persons (those whose homelands are lost to climate change) while also preserving the cultural heritage of those peoples. This problem required students to evaluate cultural significance as well as understand geopolitical issues surrounding refugees. For all three problems, teams used pertinent data and grappled with how phenomena internal and external to the system needed to be considered and measured. The student teams produced creative and relevant solutions to these complex questions and built models to handle the tasks assigned in the problems. The problems also required data analysis, creative modeling, and scientific methodology, along with effective writing and visualization to communicate their teams' results in a 20-page report. A selection of the Outstanding solution papers will be featured in *The UMAP Journal*, along with commentaries from the problem authors and judges. This year's judges remarked that due to the multi-disciplinary nature of the problems, teams solved these problems using a variety of methods and tools. This allowed teams to showcase their strengths in many diverse areas including climate science, cooperative systems, cultural preservation, data science, ecology, environmental science, international relations, networks, operations research, policy, political science, sports analytics, statistics, and sustainability.

This year's contest ran over two weekends from Thursday, February 13 to Monday, February 17, 2020 for Problems D and E, and from Thursday, March 5 to Monday, March 9, 2020 for Problem F. During that time, teams of three students researched, modeled, and wrote a solution to an open-ended interdisciplinary modeling problem. The 2020 ICM was an online contest, where teams registered and obtained contest materials through COMAP's ICM Website.

ICM teams chose one of the following three problems: The D Problem involved analyzing and quantifying team dynamics. Using data provided, students developed and analyzed a passing network for a football (soccer) team in order to better understand how overall team performance. Based on their analyses, teams recommended strategies to the coach to improve team success next year. The E Problem asked teams to create a global solution to the plastic waste problem. They needed to determine a plastic waste level that could be mitigated in an environmentally safe way, while simultaneously identifying factors

2020 ICM Statistics

- **7199 Teams participated**
- **2089 Problem D (29%)**
- **2526 Problem E (35%)**
- **2584 Problem F (36%)**
- **18 Outstanding Winners (<1%)**
- **234 Finalist Winners (3%)**
- **564 Meritorious Winners (8%)**
- **1565 Honorable Mentions (22%)**
- **4612 Successful Participants (64%)**
- **34 Unsuccessful Participants (<1%)**
- **170 Disqualified Teams (2%)**
- **2 Not Judged (<1%)**

ICM is associated with COMAP's Mathematical Contest in Modeling (MCM), which was held during the same weekend. ICM is designed to develop interdisciplinary problem-solving skills in science, technology, engineering, mathematics (STEM) and the humanities, as well as competence in data science and written communication. Over the years the ICM problem topics have included environmental science, biology, chemistry, resource management, operations research, information science, public health, and network science. Each team is expected to include team members from a range of disciplinary and interdisciplinary interests in applied problem solving and modeling. To obtain additional information and a listing of all the team designations, please visit the ICM Website at: www.mcmcontest.com.

Major start-up funding for the ICM was provided by a grant from the National Science Foundation (through Project INTERMATH) and COMAP. Additional support is provided by The Institute for Operations Research and the Management Sciences (INFORMS). COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, workers, and community leaders.
